

DILIP

Full Stack Web Developer

Phone: 7065562980 | Email: dilip7065kumar@gmail.com | Portfolio: portfolio1-ehew.onrender.com

GitHub: github.com/DilipWebPandit

Career Objective

Full Stack Web Developer (MERN + Next.js) with hands-on industry experience building production web applications, REST APIs and branch-based deployments. Strong in Node.js backend development, API testing and Git workflows. Eager to apply these skills and grow into enterprise cloud application development on SAP Business Technology Platform (BTP).

Education

Bachelor of Computer Applications (BCA) – Indira Gandhi National Open University (IGNOU)

Completed 2026 | Percentage: 61.6%

Technical Skills

Frontend: HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Database: MongoDB

Tools: Git, GitHub, Jenkins (deployment), Postman

Experience

Nakkashii Designer Hub — *Full Stack Web Developer* | Feb 2026 – Present

- Started with frontend development using **React.js / Next.js** and **Tailwind CSS**, and moved to full stack tasks within two months.
 - Working on API integration, form submissions, authentication flows, and dashboard-based modules.
 - Tested REST APIs in **Postman**, covering cookie-based authentication, different cookie types, credentials, and raw JSON request bodies.
 - Deploy applications through **Jenkins** using branch-based deployments from GitHub, including configuring credentials.
 - Fixed production bugs and handled API-related issues (400/500 errors) through frontend–backend debugging.
 - Followed clean code practices and collaborated using Git-based workflows.
-

Projects

ConnectWrite (Full Stack Blog Application)

Developed a complete blogging platform where users can register, verify via OTP email authentication, and manage posts (create, read, update, delete). Implemented secure login, logout, and email notification features using Node.js and MongoDB.

Emoji Hub (React App)

Built a dynamic emoji browser using React where users can filter emojis by category and type (PNG/SVG). Enabled downloading emojis in selected formats and displayed emoji descriptions fetched via public API.

Recipe Explorer (API Project)

Created an interactive recipe explorer using a public food API. Users can browse recipes by food type (Chicken, Rice, Pizza, Cake, Wheat) and view detailed instructions for each dish.

Achievements / Certifications

Completed Backend Development Course from Physics Wallah (PW) with certification.
